|--|----------|--------------------------|---------------------------------------|
| Postural and vocal development during the first year of life in infants at heightened biological risk for AS                         | \$0      | Q1.L.A                   | University of Pittsburgh              |
| Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior | \$0      | Q1.L.B                   | Carnegie Mellon University            |
| The role of genetics in communication deficits in autism spectrum disorders  | \$0      | Q2.S.D                   | University of Pennsylvania            |
| Simons Variation in Individuals Project (Simons VIP) Functional Imaging Site and Structural Imaging/Phenotyping Site                 | \$0      | Q2.S.G                   | Children's Hospital of Philadelphia   |
| Reliability of Sensory-Evoked Activity in Autism<br>Spectrum Disorders- Project 1  | \$0      | Q2.L.B                   | Carnegie Mellon University            |
| A study of autism  | \$0      | Q2.L.B                   | University of Pennsylvania            |
| CDI-TYPE II: From language to neural representations of meaning  | \$0      | Q2.Other                 | Carnegie Mellon University            |
| Transcriptional responsiveness in lymphoblastoid cell lines  | \$0      | Q2.Other                 | University of Pennsylvania            |
| Using high definition fiber tracking to define developmental neurobiologic mechanisms & a neural basis for behavioral heterogeneity  | \$0      | Q2.Other                 | Carnegie Mellon University            |
| Early life environmental exposures and autism in an existing Swedish birth cohort  | \$0      | Q3.S.H                   | Drexel University                     |
| Evaluating epidemiological and biostatistical challenges in the EARLI investigation  | \$0      | Q3.L.A                   | Drexel University                     |
| A history of behavioral genetics   | \$0      | Q3.Other                 | University of Pittsburgh              |
| Examination of the mGluR-mTOR pathway for the identification of potential therapeutic targets to treat fragile X                     | \$0      | Q4.S.B                   | University of Pennsylvania            |
| Efficacy and sustainability of the STAR program  | \$0      | Q4.S.D                   | University of Pennsylvania            |
| Evidence-based cognitive rehabilitation to improve functional outcomes for young adults with autism spectrum disorders               | \$0      | Q4.S.F                   | University of Pittsburgh              |
| A randomized clinical trial of cognitive enhancement therapy for adults with autism spectrum disorders                               | \$0      | Q4.S.F                   | University of Pittsburgh              |
| Tailored behavioral intervention for insomnia in children with autism spectrum disorders   | \$0      | Q4.S.H                   | University of Pennsylvania            |
| SBIR Phase I: A consumer robot designed to help children with autism spectrum disorders practice critical social skills              | \$0      | Q4.Other                 | Interbots LLC                         |
| Project IMPRESS - Interactive Master's: Preparing,<br>Responding, Enhancing School-based Speech-<br>Language Pathologists            | \$0      | Q5.L.C                   | Bloomsburg University of Pennsylvania |
| Partners in Schools: A program for parents and teachers of childen with autism   | \$5,000  | Q5.L.C                   | University of Pennsylvania            |
| Adverse prenatal environment and altered social and anxiety-related behaviors  | \$15,000 | Q4.S.B                   | University of Pennsylvania            |
|  |          |                          |                                       |

| Project Title   | Funding   | Strategic Plan Objective | Institution                         |
|---|-----------|--------------------------|-------------------------------------|
| Development of Vocal Coordination between Caregivers and Infants at Heightened Biological Risk for Autism Spectrum Disorder   | \$25,000  | Q1.L.A                   | University of Pittsburgh            |
| GABA and Gamma-band Activity: Biomarker for ASD?  | \$25,000  | Q2.S.D                   | University of Pennsylvania          |
| Effects of incidental teaching on expressive language of school age children with ASD who use AAC   | \$27,344  | Q4.L.D                   | Pennsylvania State University       |
| Prenatal Androgen in Meconium and Early Autism<br>Spectrum Disorder Related Neurodevelopmental<br>Outcomes  | \$29,423  | Q3.S.H                   | Drexel University                   |
| Stress as a Predictor of Outcomes for Adults with Autism Spectrum Disorders   | \$29,500  | Q6.Other                 | University of Pittsburgh            |
| Probing the temporal dynamics of aberrant neural communication and its relation to social processing deficits in autism spectrum disorders  | \$29,987  | Q2.Other                 | University of Pittsburgh            |
| Assessing sleep regulation, sleep-dependent memory consolidation, and sleep-dependent synaptic plasticity in mouse genetic models of schizophrenia and autism spectrum disorders              | \$32,469  | Q2.S.E                   | University of Pennsylvania          |
| Multi-Site, Randomized, Controlled Implementation Trial of an Evidence-Based, Adult and Peer-Mediated Social Skills Intervention for Elementary School Children with Autism Spectrum Disorder | \$40,000  | Q5.S.C                   | University of Pennsylvania          |
| Partners in Schools: A program for parents and teachers of children with autism   | \$47,114  | Q5.L.A                   | University of Pennsylvania          |
| The BUFFET Program: Building Up Food Flexibility and Exposure Treatment   | \$53,104  | Q4.Other                 | Children's Hospital of Philadelphia |
| Misregulation of microtubule dynamics in Autism   | \$60,000  | Q4.S.B                   | Drexel University                   |
| Characterizing 22q11.2 abnormalities  | \$62,498  | Q2.S.D                   | Children's Hospital of Philadelphia |
| Unreliability of neuronal responses in mouse models of autism   | \$62,500  | Q2.Other                 | Carnegie Mellon University          |
| Genetic contribution to language-related preclinical biomarkers of autism   | \$63,513  | Q2.S.D                   | University of Pennsylvania          |
| Phenotypic characterization of MECP2 mice   | \$64,742  | Q2.S.D                   | Children's Hospital of Philadelphia |
| Assessing interactive avatars for use with children with autism   | \$72,883  | Q4.Other                 | Carnegie Mellon University          |
| Increasing ASD screening and referral among NYC's Korean Americans  | \$79,680  | Q5.L.A                   | University of Pennsylvania          |
| Statistical methodology and analysis of the Simons Simplex Collection and related data  | \$80,389  | Q2.S.G                   | University of Pennsylvania          |
| (SDAS) Access to Therapy for Children with Autism: A Population-Based Analysis  | \$100,000 | Q5.S.A                   | Thomas Jefferson University         |
| Cognitive control of emotion in autism  | \$102,004 | Q2.Other                 | University of Pittsburgh            |
